CONSTRUCTION PERMIT OFFICER: _____ DATE: _____

GENERAL PROVISIONS

NOTIFICATION: Contact Ohio Utilities Protection Service at 811 or 1-800-362-2764 before excavating. The Wayne County Engineer's Office (330-287-5500) shall be notified a minimum of 24 hours prior to construction for inspection purposes.

TRAFFIC CONTROL: Proper lights, signs, barricades, flag-persons and procedures shall be performed in accordance to the latest edition of the Ohio Manual of Uniform Traffic Control Devices. A minimum of one lane of traffic must be opened and traffic controlled at all times during construction.

POLES, WIRES, CABLES, ANCHORS & PEDESTALS: Poles, anchors and pedestals are to be placed to the extreme limits of the road right-of-way line(s) as possible. Vertical clearance of wires and cables shall be a minimum of 16.5 feet. Pedestals need to be visible (or marked appropriately) when surrounded by high vegetation. The Wayne County Engineer's Office assumes no responsibility for damaged pedestals while performing maintenance and/or construction activities.

TELECOMMUNICATIONS & FIBER OPTIC INSTALLATIONS, CONDUITS, SPLICES, VAULTS, HAND HOLES, BOXES: No installations or structures shall be placed in the berm, between the road edge & ditch line, in the flow line of the ditch, in the bottom of the ditch, or on the back slope of the ditch. All conduit shall be placed to extreme limits of the Right-of-way. All conduit shall be placed not less than 36" below the flow line of the ditch. When a fence is on the right-of-way line – any installations or structures shall be placed on the backside of the fence. Acquiring additional ROW is the responsibility of the facility owner or contractor.

UNDERGROUND ROAD CROSSINGS: All public road crossings shall be bored. Open cutting of the road pavement is not allowed. The Wayne County Engineer must be requested in writing if boring the road is reasoned to be impossible. The Wayne County Engineer will then determine if open cutting will be appropriate and if so, shall list any special requirements that will need to be performed during the work. Underground conduits (pipes, wires, cables, etc.) shall be a minimum of 3 feet below ditch lines and/or 5.5 feet below the centerline of the existing pavement.

CASING & VENTS: Casing and vents may be required for carrier pipes that transport liquid petroleum or natural gas under pressure. Casing vent pipes shall be a minimum of six (6) feet above finished grade.

BACKFILLING: Trenches or openings shall be properly backfilled with suitable material placed and compacted in lifts not to exceed eight (8) inches. Pavement replacement (when necessary), will be done by the contractor according to specifications outlined by the Wayne County Engineer.

DAMAGES/RESTORATION: Ditches and earth surfaces (if disturbed) will be restored to original condition or better with proper grading, seeding and mulching. Damaged pavements, bridges, culverts, drainage pipes, driveways, road berms, mailboxes, fences, etc. shall be replaced/restored as directed by Wayne County Engineering.

MANHOLES: When placed in the berm, they shall be located at a depth whereby the berm can be maintained over the top of the manhole. Manholes will not be permitted in the pavement or ditch line.

HOLD HARMLESS: Owner/Applicant agrees to hold harmless, indemnify and defend the Wayne County Engineer, Wayne County and the applicable Board of Township Trustees, their officers, employees, and agents against any and all claims, losses, damages, or law suits for damages arising from, allegedly arising from, or in any way related to the work to be performed in conjunction with this permit.

COMPLIANCE: Permit holder agrees to adhere to the General Provisions or the Wayne County Engineer may revoke the permit and stop work at any time construction activities are deemed to be unsafe or substandard by any manner.
